PERSONAL PROJECTS

React-Chat-app (11/2021 - 12/2021)

- This is a online chat application created using React in frontend and NodeJS, Express and MongoDB in Backend. In this application i used Socket.io for connecting the frontend and backend role.
- Link :- <https://61b4a139aa4aa5de704a2124-quirky-spence-821975.netlify.app/>

BR-Meal (08/2021 - 08/2021)

- This is a online food ordering website with all the features which are there in a professional website. I created this application taking in mind the future of online food ordering website is going to increase exponentially.
